LIST

Assisting in Data Collection effort

Last Modified: 16 May, 2024

~~ABOUT~~ →

Obesity has emerged as a critical public health concern globally, with profound implications for individuals' physical and mental well-being. Its prevalence among adolescents has increased yearly, presenting a complex challenge beyond physical health. This research delves into the Knowledge, Attitudes, and Practices (KAP) surrounding obesity among high school students in the Dhaka division of Bangladesh, while also examining associated risk factors and the mental health impact of this pervasive issue. By exploring these dimensions, this study seeks to contribute valuable insights to the ongoing discourse on combating obesity and fostering holistic well-being among adolescents in Dhaka, Bangladesh.
